One Troll Army download directIn a secretarial system such as a word processor or a personal computer, a so-called personal computer system, a copy of an original document is often generated in the form of a hard copy. In the case of, for example, a word processor, the user inputs characters into an input unit such as a keyboard and the characters are stored in a RAM, and when the input is complete, the character-data stored in the RAM are subjected to a process for editing, such as cutting, pasting, and the like and then the result is printed out or displayed on a monitor or a CRT display. A personal computer system comprises an interface for communication with other apparatus such as a printer or a personal computer. The personal computer system is provided with a power switch for turning off the power supply. In the case of a personal computer, for example, a power switch is provided for the hard disk drive (HDD) and a power switch is provided for the CPU (Central Processing Unit). The invention relates to a switching device that is used for turning on/off the power of a plurality of devices such as power supplies for supplying a power to the HDD and CPU, or a power switch for turning off the power of the apparatus. A conventional switching device is disclosed, for example, in Japanese Patent Application Laid-open No. HEI 7-224026. The conventional switching device comprises a key switch, a key releasing switch, and a power switch that 2d92ce491b
