What's New In Nimbus Screen Capture For Firefox?

- By using a Nimbus Firefox browser add-on, you can take screenshot(s) and save them locally or in the Nimbus digital space with three options, and in the case of the latter, you can upload and edit your files with another two options. - If you only plan on using this tool for taking screenshots and editing them without registration (for the digital storing and sharing options), you can make use of the instrument's capabilities in offline, unregistered mode, as well. - The Nimbus editor is a valuable instrument for blurring portions of your images, annotating the screenshot, inserting arrows or visual indicators, merging locally-stored images into your screenshots, and more. The Nimbus Screen Capture for Firefox add-on is a useful tool that lets you take and store screen captures in the online Nimbus digital space, the add-on gives you the freedom

to capture pictures with its "press-and-hold" keyboard shortcut, save them to your computer, edit them, send them to a friend or a colleague, and upload them to the Nimbus web app. The screenshot functionality of Nimbus is quite useful. You can take a screenshot with the click of a button, copy to clipboard, and select the entire screen or a section. After saving the screenshot, you can edit it in the Nimbus editor, crop the image, and then even add a watermark. The Nimbus editor is useful in various ways, for example, you can blur parts of the screen, insert arrows, or annotate the picture. You can also share the edited content through the Nimbus service, you can send the image to a friend or a colleague in a given email, or you can save the image to your local computer with a custom link. The add-on has a useful feature: you can work in offline mode as well, when you don't have access to the Internet, the Nimbus service sends you notifications when you upload or send screenshots. If you are a Firefox user, you can install the Nimbus Screen Capture add-on, and it will help you make the most of your screen in a very efficient way. What's New in Nimbus Screen Capture for Firefox? Version 1.4.0.18: Added option "Focus on Screen" on the Nimbus settings page. Added option "Select entire screen" on the Nimbus settings page. Added options for choosing the file type for local (editable) uploads and downloads (except GIFs). Tested with our web developers, now the Add-on ID is not displayed by default in the add-on folder. Screenshot hotkey for mobile browsers. What
