### What's New In?

A smart order form / list creator for a very simple, yet powerful, product list. Details: Lists can be made with the most versatile and easy to use order form software on the planet, fast and easy for you to collect any kind of data you need. Use it to make, store and manage your bill lists, catalogues, order forms, project lists, order lists, enrolment sheets, sales data, inventory lists, forms, reports, catalogues or to do lists. EzySheet offers great features, such as: Fast updation of all lists Safe backup Multi-user Scan button in each list entry Custom folder support Sorting and filtering Multi-windows support (concurrent lists / files) Text validation The possibility to save lists in different formats The possibility of output in ASCII, HTML, or Word format The possibility to define the sort order of each column (ASC, DESC) The possibility to define how the list items are displayed (as list item or not) Sorting options Custom windows EzySheet Features: Key Features: Fast updation of all lists Safe backup Multi-user Scan button in each list entry Custom folder support Sorting and filtering Multi-windows support (concurrent lists / files) Text validation The possibility to save lists in different formats The possibility to define the sort order of each column (ASC, DESC) The possibility to define how the list items are displayed (as list item or not) Sorting options Custom windows EzySheet is compatible with Windows 95, 98, 2000, XP, 2003, Vista, and Windows 8. How it works: EzySheet provides an easy way to create list and edit lists, just like a desktop order form but better. A list is like a shopping list or a list of items, just like a desktop order form or a spreadsheet, but for items, not things. Having access to both an order form and a list editor means you have a single place to enter and update your data, and you have an easy way to view it as either a list or an order form. In addition to a list, you can create a matching order form. Then both the list and the order form are maintained in one place. You can create a list or an order form for any type of data, such as: ☐
