### What's New in the?

east-tec SafeBit is an easy to use application that lets you create virtual drives, securely store and run files in these drives, and protect them from deletion or access. This is the ideal solution for securing important files from being deleted or accessed by malicious software. An easy to use wizard will guide you through the process of creating your first virtual drive. Download east-tec SafeBit to secure your computer and make sure important files are protected. east-tec SafeBit – Protect Your Files In Security Safe Your files are worth saving, but they are not worth protecting all by themselves. To protect your data and make sure your important files are kept safe from people and threats, create a virtual drive and protect it with a password. Virtual drives, also called Safedrive or encrypted volumes, are basically hidden folders and drives which, when used properly, can serve as extra security for your important files. Using this software is a simple way to protect data and make sure you don't lose your data, even if it is removed from your computer or damaged in other ways. Creating a Virtual Drive Using east-tec SafeBit It is very easy to create a security drive with this software. All you need to do is choose which type of drive to create. You can choose between a full version of windows which is hidden, or you can also make an encrypted drive. You can also select the type of drive to be created, and the location on your hard drive where it is stored. Then, you have to add the drive letter and a password. The last thing you need to do is to verify that you are happy with all the specifications, and then click on the create safe button. The software will create a hidden drive on your computer, and you will have access to it from windows explorer. This is the software you need to protect your data from being deleted, lost or modified by other applications, programs and threats. Creating a Safedrive in Windows Using east-tec SafeBit Virtual drives are hidden drives which are created on your computer. A Safedrive is nothing but a special drive. Most people have two drives on their computers. One is the hard drive, and the other is the C drive which are usually used for programs, documents, pictures, and other types of files. The C drive contains important information like your pictures, documents, text, music, videos, and files which can be used by any application. However, you don't want to leave this drive unprotected because it can be accessed by other users, or even malware. That is why you need to make it a protected drive by hiding it from Windows explorer, and setting a password. You can easily do this using east-tec SafeBit. All you need to do is to install this software on your computer. Then, you need to choose which type of drive you want to create. You can also choose the location where the virtual drive is
