A: It's complaining that the file is not a valid Windows application

because it doesn't have the extension.exe. Just execute it as usual by double-clicking. It seems to be a pirated install or a distribution from a not-officially-released piece of software. Now, I can't tell without looking at the exact text of the "What should I do?" dialog box (can't find the screenshot for some reason). If there's a "Remove" option or something to that effect, use it. 1. Field of the Invention The present invention relates generally to memory cell arrays, and more particularly to word lines in memory arrays. 2. Background Memory devices are generally available in a variety of sizes, and each particular memory device may have a specific access speed and number of memory
