I have purchased a new laptop and am using ubuntu as my os, I downloaded and installed adobe reader for linux and am not getting any download options, I tried using win 7, 8 and now 10 and am not able to do the download. Can anyone help me please? A: So I finally fixed it, I had ubuntu in synaptic and adobe reader, cause I thought that the both programs are installed, I had to uninstall the ubuntu and then I installed adobe reader again and it worked.
