#### **iShield Plus Crack+**

Real-Time, ON-LINE report: shows you at a glance what, when and which activity took place on your child's computer, and which sites they visited. Online Report Generation: allows you to easily generate a report of your child's Internet activities which can be reviewed at your leisure. LIMIT your child's Internet usage: take control of your child's Internet usage by limiting what programs they can use to browse the Internet. iShield Plus has a built-in timer to limit Internet time. Lock down websites your child shouldn't visit: iShield Plus will lock out content from sites that you have deemed unsuitable for your child. You will be able to control which sites are blocked from your child's Internet access. Prevent unwanted changes to privacy settings: the option to prevent new privacy settings being assigned to applications that you consider risky to your child. Virus Protection: iShield Plus protects the computer from computer virus, Trojans, Spyware, Root Kits and other potentially dangerous programs that can cause your child or parents real harm. Parental Lockdown: Don't allow children to use the Internet at all. Lockdown features allow parents to completely restrict their children's Internet usage. Here's what our family has to say about iShield Plus: "iShield Plus is our answer to computer based internet pornography and hectic usage. We now know the source of usage problems. It's all there. Thank you, iShield Plus." Vicky & Shane iShield Plus is a complete Parental Control solution for protection against computer based pornography and illegal web content. iShield Plus allows you to control Internet surfing times and determine which software applications are OK to run. iShield Plus also monitors Internet Communications and safeguards personal information. Incident Reports document potential problems for your review. iShield Plus is designed for ease of use and can be set up for individual members of the family with minimal fuss. You should not make any changes to registry settings, virus definition files or to the Internet Explorer security zone without the assistance of a trained computer expert. Even if a professional programmer prepares the changes, this can cause serious problems that may require reloading of the operating system. It's the owner's responsibility to make sure that the computer complies with current laws and regulations. The owner needs to be careful not to disclose any private information.
