

March 8, 2017 - I have runway lights but no taxiway lights. Sode is the latest and registered. While the scenery is loading, I light up for 1 second, but when . net starts up, then the lights don't appear. I think this is not related to .net or WPF. If I remove these lights with the Lights Manager, the lights should appear on the taxiway. They are currently not working. If you can help please help us. I think this is a .net issue because I've never had to do this kind of thing. This was the last time I used WPF when I can't figure out what I'm doing wrong.
