☒ The first of several add-ons that are part of our entire solution that we're aiming to release very soon. It is the first add-on to help you make the most of the Outlook contacts and media. It offers a lot of possibilities to connect and sync your contacts and media to the same place, which in turn helps you organize them so that you can create a virtual memory area that helps you save time searching and waiting for your media to sync across your computers. You can access and connect your media by importing it, or just by syncing it to your PC and you can access it from any device in Coolect. This add-on is based on the latest version of the Microsoft Outlook, which means that it is compatible with all the major versions of Windows starting from Windows 2000 to Windows 8. Coolect only works in Windows Vista (SP2+) and Windows 7. The add-on provides a quick and intuitive way to access all your media in various folders, add them and get a visualisation of all the items. You can organize and categorize your media easily. Features: - Import Items from Outlook 2010, 2003, 2000, XP, Vista and later - Browse, select and connect your media - Connect media from other folders and your email contacts - Customize media navigation and link buttons - Upload your own images for album covers or background - Explore your media from a variety of devices - Synchronize your media using your Wi-Fi Connection - Import your entire contacts list from Outlook or Outlook Express - Import specific items from your contacts with a simple drag and drop - Export your entire media list - Create audio notes and journal entries - Import and export your

Embedding and video PowerPoint presentations in Microsoft Outlook 2003 Excerpt From Developer Hub Article By Jonah Schupp Microsoft PowerPoint 2003 is a great tool to create some impressive presentation slides and drive home your point to your audience. However, you can also take your existing slides and create an embedded or video version with PowerPoint. When you are ready to publish your presentation, then there are a few things you need to remember. First, you need to make sure your PowerPoint presentation is already published as a PDF document. We can't run this scenario without a PDF document, so in order to publish the presentation, you need to first import it into PowerPoint. After you import the presentation, you can continue to build your slide deck. However, if you make changes, you must save the presentation in

Download Coolect Plug Me To the extent of the bargain, I was sent a desktop version of the program - I did try it and it worked fine, but in the end I'm not great with computers (heck, I can barely work out how to download some blokes from Craig's list) and my so-called geek cousin wasn't all that thrilled to have the program on his desktop and found it a bit confusing. For those with a bit more expertise, the program seems to be able to record all our media - video, photos, music or whatever - into a database and then create all kinds of playlists - based on tags or categories or favourite music, movies, etc. You can then share the playlists - which are all stored in the database - using email. It took a bit of sorting to find out how the various media items worked, but after that - it was
