Create images, use presets for vintage, travel and more, as well as portrait presets for every skin tone. Even detailed adjustments are very easy...everything looks like a canvas that you have full control over. Lumix V-Live works great when shooting handheld in RAW format, allowing you to shoot at high bitrates. And he also knows how to shoot FullHD video, which is very important for mobile devices. Pictures from the LG V-Pix camera look very natural even when shooting in low light conditions, thanks to the correct exposure. The lens takes amazing pictures with low noise.
