Natural history of enchondromas treated by debridement, curettage, and bone grafting. We reviewed 46 consecutive patients with painful enchondromas of the proximal end of the tibia treated by curettage, debridement, and autologous cancellous bone grafting. Patients were contacted with a follow-up ranging from 12 to 14 years (average, 13.9 years). Eighteen patients (39 percent) went on to develop painful lesions and associated skeletal pathoses in other bones in the same limb. Sixteen (35 percent) went on to develop lesions in the contralateral limb. Of the 46 treated lesions, 36 (78 percent) were considered to have been cured by the procedure. Only five (12 percent) had a favorable clinical course, compared with 28 (60 percent) that had an unfavorable course. Are you having trouble finding an IT job? I'll tell you how to leverage your tech skills to get hired anywhere. - abhaymanohar

online! Profile crib Profile cribs are cribs that are designed to fit into existing baby furniture.

These cribs are easy to assemble and allow the use of the crib without the use of a bed. So if you want to free up your home but don't have the room or don't want to invest in a complete bed, this may be the perfect solution. You should buy a tall profile crib for children who are between the ages of three and five. This is because these cribs are tall enough for the child to stand up, but not quite tall enough

---

that it requires an adult to hold  
the child up. Keep in mind that  
as the height of the crib  
decreases, the width  
decreases, so make sure
